**Silver Communication** working with the world's best

Dramatic advancements in technological skill and innovation are transforming India into the world's newest fast-growth economy and reshaping the way global corporations do business.

In today's world of complex IT solutions, intense competition, and global expansion, many organisations have come to realise that they can't do everything on their own. The need to focus limited capital, resources and management attention on core areas of expertise has accelerated the outsourcing of activities to business partners who have expertise in a specific service or function.

Silver Communication, with an international client base that covers more than 1,200 projects in 45 countries, are in a prime position to fulfil the needs of the global village by offering innovative and high quality IT and business solutions to international clients. Silver Communication already captures the pulse of global business by delivering projects in English, German, Spanish, Arabic, Greek and Turkish.

India's natural resource lies in an abundance of technically skilled manpower that has transformed India into an outsourcing paradise. Here is one country that offers cost-effectiveness, great quality, high reliability, speedy deliveries, a large pool of computer literate and English speaking professionals and, above all use of state-of-the-art technologies especially in software development.

As a result, Silver Communication has achieved rapid growth since starting operations in May 2000. Our expansion has been steered by efficient adaptation to changing requirements in business and evolving technology. A key part of our success is our highly

scalable, world-class infrastructure, which allows Silver Communication to immediately up-scale our business capabilities according to the needs of our clients.

To offer the very best to our customers, Silver Communication has emphasised continuous knowledge base development. This is reflected in ongoing training and knowledge that allows our staff base to remain a step ahead of our competitors on emerging technologies. We offer our clients various Flexible Engagement Models in captive business, including Built-Operate-Transfer, and infrastructure outsourcing in areas such as IT support services.

Our virtual competencies are extensive, and include insurance, banking, energy and utilities, travel, tourism and transportation, healthcare, telecom, media, retail, and manufacturing.

Silver Communication offers specialist services in the error-free conversion of PDF to HTML/XML, and digitisation using CAD/CAM technology. World-class standards are incorporated in our software Polytechnique practices, ensuring high quality project management and timely delivery of projects. Our expertise encompasses business analysis, technical designing, programming and integration, ensuring fully integrated business solutions.

Our dedication to innovation accelerates our clients' productivity making Silver Communications the ideal business partner for the new century – one that is equipped to offer end-to-end robust and scalable solutions that span your long-term business plans.
